Refills and Prior Authorizations

Our team is here to help you get your child's medications in a timely manner. Here are some tips for getting medicine refills

Call your pharmacy when you need a prescription refill.

If you call the office a prescription refill or prior authorization request will only be taken

MONDAY THRU FRIDAY 8:00 AM- 4:00 PM. DO NOT CALL AFTER HOURS OR ON WEEKENDS, these are only done during normal business hours.

Refills will take up to 2 business days.

Call for refills when you child still has about 7 days of medication.

NOTE: We will only refill medicines if our office has seen your child in the past 12 months. If it has been close to a year since your child has seen a health care provider, but he/she still needs refills, call the office to schedule an appointment.

Insurance Approvals

- Prior Authorizations can take up to 10 business days
- The insurance company may ask the health care provider to use a different medicine.

Letters of Medical Necessity

- Letters of Medical Necessity will take up to 14 business days

Our Contact Information

To contact the Gastroenterology office:

Phone: 513-636-4415

Fax: 513-636-7805

DISCHARGE HOME INSTRUCTIONS

Chaim M. Segev MRN: 12161484  Hirschsprung's disease  8/23/2022 - 9/28/2022  A4S

Notify Provider

General Surgery - When to Call the Provider:
If you have a medical emergency, call 911.

Call the GI Office 513-636-4371, after hours call 513-636-4415 and ask for GI physician on call, if you notice that he has:

- Vomiting
- Abdominal bloating
- No ostomy output for 12 hours or increase in stool output (over 1300 ml in 24 hour period)

For fever 100.4 F (38.0 C) or higher please immediately call above numbers and refer to letter titled "FEVER WITH A CENTRAL LINE"

Feeds:

Neocate Jr 26 cal/oz
45 ml/hr X 14 hours at night
60 ml boluses X 2 daily

Refer to recipe provided by dietician on how to mix formula

Limit oral fluids to 750 ml in 24 hour period.
OK for foods on list provided. Avoid sugary and sweet foods and drinks.

Wound Care

Your Child's Next Steps

? Ask

- ☐ Ask how to get these medications
 - heparin
 - sodium chloride
 - sodium chloride 1,000 mL with potassium chloride 10 mEq/L IV solution

👍 Do

- ☐ Pick up these medications from CCHMC BASE RETAIL PHARMACY
 - cholecalciferol
 - loperamide
 - pantoprazole (PROTONIX) 2 mg/mL solution

Please review your child's full appointment list

MyChart

To sign up for a MyChart account, please stop by any registration desk, or visit the Family Resource Center on main campus. You can also go online at cincinnatichildrens.org/mychart and request an activation code.

If you have any questions about MyChart, please call 513-636-5019, or toll-free 877 508 7607. MyChart is NOT to be used for urgent needs. For medical emergencies please call 911.

Wound Care (continued)

General Surgery - Caring for the Incision:

2-3 days after surgery:

- If your child has clear tape over the steri-strips (white tape), you may remove it
- Keep the steri-strips in place

7-10 days after surgery:

- The steri-strips will most likely fall off during this time
- If the steri-strips fall off before 7 days after surgery and the wound is closed and not red, place a Band-Aid over the incision to protect it

2 weeks after surgery:

- Take off the steri-strips if they are still in place
- Once you remove the steri-strips, gently wash the area while bathing

Additional Discharge Instructions

General Surgery - Follow-Up Appointment:

Follow up as scheduled October 5th

Chaim M. Segev MRN: 12161484

9/30/2022 - 10/2/2022 A4S

Notify Provider

How to reach the GI team:

Your GI provider is Samuel A. Kocoshis, MD

Monday-Friday 8:30AM - 5:00PM, call 513-636-4415.
After 5PM, during weekends or holidays, call 513-636-4200
and ask for the Gastroenterology Fellow on-call.

General Home Instructions:

This After Visit Summary provides basic instructions for you to follow at home. Your child was admitted for treatment of fever with a central line. He had a positive viral panel for parainfluenza which is a common virus that causes the common cold and congestion which likely caused his fever. He was on antibiotics for 48 hours and his blood culture showed no growth of bacteria at 48 hours. Please call the GI team with any questions or concerns or if your child experiences any of the following:

- repeat fever greater than 100.4F
- lethargy and not acting herself, not waking up or responding
- fast breathing
- inability to tolerate home feeds
- any other concerns

Diet Instructions

Diet Instructions:

Continue your typical home feeding schedule.

 CHANGE * sodium chloride 0.9 % lock flush Commonly known as: NS 3 mL by Intravenous route as directed for see PRN comment (flush before and after fluids, medications and blood). Central Line. Flush each lumen of central line. Last time this was given: Ask your child's nurse or doctor What changed: Your child was already taking a medication with the same name, and this prescription was added. Make sure you understand how and when your child should take each.					
 CHANGE * sodium chloride 0.9 % lock flush Commonly known as: NS 1 mL by Intravenous route as directed for see PRN comment (to assess and restore patency of the central line.). Central Line. Flush each lumen of central line. Last time this was given: Ask your child's nurse or doctor What changed: Your child was already taking a medication with the same name, and this prescription was added. Make sure you understand how and when your child should take each.					

Medication List (continued)

	Morning	Afternoon	Evening	Bedtime	As Needed
 CHANGE * sodium chloride 1,000 mL with potassium chloride 10 mEq/L IV solution by Intravenous route continuous. Give 500 ml over 2 hours (250 ml/hr) each evening Last time this was given: Ask your child's nurse or doctor What changed: Another medication with the same name was added. Make sure you understand how and when your child should take each.					
 CHANGE * sodium chloride 1,000 mL with potassium chloride 10 mEq/L IV solution by Intravenous route continuous. Last time this was given: Ask your child's nurse or doctor What changed: Your child was already taking a medication with the same name, and this prescription was added. Make sure you understand how and when your child should take each.					

 * This list has 8 medication(s) that are the same as other medications prescribed for your child. Read the directions carefully, and ask your child's doctor or other care provider to review them with you.

Where to pick up your child's medications

Ask your child's doctor where to pick up these medications

- heparin 10 UNIT/ML lock flush syringe
- sodium chloride 0.9 % lock flush (2 prescriptions)
- sodium chloride 1,000 mL with potassium chloride 10 mEq/L IV solution

If your provider has signed any paper prescriptions, be sure to take those with you when you leave the hospital. If you need to change the pharmacy where any electronic prescriptions were originally processed, you can contact that pharmacy to request a transfer to your preferred pharmacy. This transfer process is not possible for narcotics. Please contact your provider for a new prescription if a narcotic needs to be sent to a different pharmacy.

Refills and Prior Authorizations

Our team is here to help you get your child's medications in a timely manner. Here are some tips for getting medicine refills

Call your pharmacy when you need a prescription refill.

If you call the office a prescription refill or prior authorization request will only be taken

MONDAY THRU FRIDAY 8:00 AM- 4:00 PM. DO NOT CALL AFTER HOURS OR ON WEEKENDS, these are only done during normal business hours.

Refills will take up to 2 business days.

Call for refills when your child still has about 7 days of medication.

NOTE: We will only refill medicines if our office has seen your child in the past 12 months. If it has been close to a year since your child has seen a health care provider, but he/she still needs refills, call the office to schedule an appointment.

Today's Visit

You saw Dr. Samuel Angelus Kocoshis, M.D. on Thursday March 30, 2023. The following issues were addressed: Short gut syndrome and Hirschsprung's disease.

BMI

15.26 (18th percentile)

Reference: CDC (Boys, 2-20 Years)

Weight

29 lb 1.6 oz (45th percentile)

Reference: CDC (Boys, 2-20 Years)

Height

36.61" (77th percentile)

Reference: CDC (Boys, 2-20 Years)

Head Circumference

49.7 cm (64th percentile)

Reference: CDC (Boys, 0-36 Months)

MyChart

To sign up for a MyChart account, please stop by a Cincinnati Children's clinic at any time and ask for a MyChart activation code. No appointment is necessary and you can go to any location, even our neighborhood locations.

If you have any questions about MyChart, please call 513-636-5019, or toll-free 877 508 7607. MyChart is NOT to be used for urgent needs. For medical emergencies please call 911.

Instructions (continued) from Dr. Samuel Angelus Kocoshis, M.D.

Insurance Approvals

- Prior Authorizations can take up to 10 business days
- The insurance company may ask the health care provider to use a different medicine.

Letters of Medical Necessity

- Letters of Medical Necessity will take up to 14 business days
